## IDENTIFIED PRIORITIES

### Food Security

The food situation is still of concern. The number of persons affected by food insecurity is estimated to be around **3.5 million**, including **1.4 million** people in need of immediate food assistance and **2.1 million** that are under pressure.

### Nutrition

Humanitarian organizations are only covering 542 out of 1,265 nutritional rehabilitation units due to insufficient resources. For the time being, this situation does not allow to insure the transition to the scale of activities related to the nutritional management of malnutrition.

### Health

Since May 22, no cases of cholera have been recorded. Notwithstanding prevention measures, the resurgence of cholera remains a threat. Risk factors include the consumption of contaminated water, the precariousness of hygiene and sanitation conditions, and the ongoing epidemic in neighbouring Niger.

### Funding

**\$132 million** has been disbursed to the 2013 Mali CAP, out of **\$409.7 million** required. An additional amount of **\$107.3 million** has been allocated to projects not listed in the Mali 2013 Appeal.

\* A total number of 46 refugees in Guinea and Togo are included in the 174,129 refugees reported by UNHCR (<http://data.unhcr.org/MaliSituation/regional.php>). The figure of 50,000 refugees for Niger is an estimate as UNHCR is finalizing a countrywide registration.
