

Feed Millions More People Through Food Aid Reform

U.S. food aid began
in 1954 to address world hunger.
The program known as “Food for Peace”
has fed more than 3 billion people.
But the system is outdated
and needs reform.

CARE is fighting to save millions more people through...

LOCAL AND REGIONAL FOOD PROCUREMENT

Local and Regional Food Procurement
means purchasing food locally

ELIMINATION OF MONETIZATION

Monetization means selling U.S. grown
food on the open market.

Emergency Aid shipped overseas takes on average
130 days with as much as half the funding being
spent on transportation and overhead not food.

This is slow and expensive

Monetization can undercut smallscale, local farmers and
about **30%** of funds go to shipping and administrative
costs – not to development programs.

This is unfair and self-defeating

CARE advocates for food aid reform that results in...

*Faster, more flexible delivery
of emergency food aid*

56 DAYS
vs
130 DAYS

*Local economies
jump started*

*More money available for
development projects*

\$30M+
A YEAR

We can achieve this all

without spending an extra penny!
