

Gender Equality

FY22 IMPACT SNAPSHOT

CARE seeks to support people of all genders to experience greater gender equality in their lives. We do this by **implementing standalone gender equality projects** that have gender equality as their primary objective *and* by **integrating gender equality approaches** into other programs.

In FY22* CARE's **gender equality programs reached 10.9 million people** across **90 countries**.

Since the start of CARE's [Vision 2030](#), **5.9 million people** across 67 countries have experienced greater gender equality in their lives.

CARE's impact on gender equality

668,000 women and girls participated in formal/informal decision-making spaces.

37,000 girls participated in girl-led advocacy.

101,000 women and girls influenced public decision-making and structural changes.

144,000 women and girls reported confidence in their own negotiation and communication skills.

353,000 students have improved learning outcomes.

412,000 students have benefitted from the implementation of school improvement plans addressing gender issues.

259,000 people of all genders are rejecting intimate partner violence.

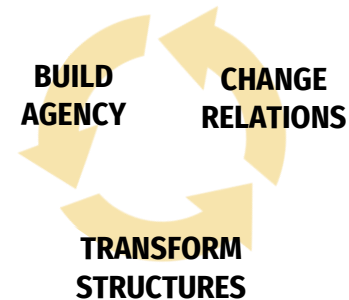

135,000 people have accessed GBV prevention and response services in emergencies.

Creating sustainable change

CARE's approach to gender equality is guided by our [Gender Equality Framework](#). We aim to address the root causes as well as the symptoms of gender inequality so women and girls in all their diversity see lasting change in the power and choices they have over their own lives. To achieve this, we work across all areas of the lives of people of all genders.

4.8 million people positively impacted by projects which **increased agency**.

984,000 people positively impacted by projects which promoted more **equal relations**.

483,000 people positively impacted by projects which **transformed structures**.

CARE's contributions to the Sustainable Development Goals

16.5 M

Women and girls **increased their empowerment and gender equality**, in **74 countries**, since 2015.

* Reach data covers fiscal year 2022, from July 2021-June 2022. Impact data is measured cumulatively since the start of CARE's Vision 2030 strategy in 2020.
