

CARE, Our Partners, and the Sustainable Development Goals

Since 2015, CARE has been tracking impact metrics in line with the Sustainable Development Goals. In 2021, CARE shifted to 30 impact indicators for [CARE's Vision 2030](#), still aligned with the SDGs. The SDGs represent a collective, global commitment to a transformed world. It is only right that an organization like CARE also be accountable to demonstrating how its work contributes to these shared goals toward this collective vision.

Between 2015 and 2023 CARE and our partners have **contributed to global change for 206 million people in 83 countries**. We use the word “contributions” deliberately: in all our work, change happens through the combined efforts of many different actors, including civil society and movements, governments, and the private sector. Our programs are just some of the contributing factors that [lead to these impacts and outcomes](#).
